

Stuck In Your Head

I Prevail

You're not the one I want in my bed
But I'm gonna be the song stuck in your head

Stuck in your head

Guess what?
For the record you're the broken one
Tried to sing along but we got stuck
So we turn it over and over again
But now,
A thousand scratches on the song we held
A million cuts finally wore it down
Couldn't turn it over and over again

Turn it over and over again

This'll be the last time that I spin our life
Never gonna play again
You're not the one I want in my bed
I'm not the song you want in your head
This'll be the last time that I spin our life
Never gonna play again
You're not the one I want in my bed
But I'm gonna be the song stuck in your head

Stuck in your head

Guess what?
Didn't wanna have to write these words
Now you're on the other side reversed
Never turning over and over again
So now,
I'll turn it off cause it's so damn loud
All your lies finally wore me down
You can skip our track cause I'm not coming back

This'll be the last time that I spin our life
Never gonna play again
You're not the one I want in my bed
I'm not the song you want in your head
This'll be the last time that I spin our life
Never gonna play again
You're not the one I want in my bed
But I'm gonna be the song stuck in your head

You made me sick, round and round again
So I'm turning you off and I'm trading you in
Sick, so sick again
Now I'm turning you off and I'm trading you in

This'll be the last time that I spin our life
Never gonna play again
You're not the one I want in my bed
I'm not the song you want in your head
This'll be the last time that I spin our life
Never gonna play again
You're not the one I want in my bed

But I'm gonna be the song stuck in your head

Round and round again,

Now I'm turning you off and I'm trading you in (Stuck in your head)

Round and round again,

Now I'm turning you off and I'm trading you in

This'll be the last time that I spin our life

Never gonna play again (Never gonna play again)

You're not the one I want in my bed

But I'm gonna be the song stuck in your head
