

Synthetic Soul

I Prevail

God save my synthetic soul, leave my flesh and blood behind
Lost myself down the rabbit hole, now there's nothing left to find
Baptize me in chemicals, dopamine, and cyanide
Watch me decompose in the artificial light

I stare into reflections
That look like something
I once knew in essence
It's all for nothing

It's all for nothing
It's all for nothing
It's all for nothing

God save my synthetic soul, only ash and dust remain
Where I'll go, only heaven knows, but I'll feel it just the same
Buried in the afterglow, move on, forget my name
Watch me decompose in an unforgiving way

I stare into reflections
That look like something
I once knew in essence
It's all for nothing

Burn me out or let me fade away
It's all for nothing
I'm holding on to things I cannot change
It's all for nothing

I will atone for all of my sins
For all of my flaws
Bring me the rapture
Tear me apart
Tear me apart

I will atone for all of my sins
For all of my flaws
Bring me the rapture
Tear me apart
Bleed me out
Broken and scarred
Bring me the rapture
Tear me apart

I stare into reflections
That look like something
I once knew in essence
It's all for nothing

Burn me out or let me fade away
It's all for nothing
I'm holding on to things I cannot change
It's all for nothing

God save my synthetic soul, leave my flesh and blood behind
