

# D4MAGE DONE

I See Stars

Take one  
There's a million people in my head  
Another million people in my bed  
I think they nearly heard every word I said  
Every word I said  
Hiding behind blue lights  
Blue lights  
Blue lights  
Yeah in your eyes are blue lights  
Blue lights  
Blue lights

We're just damage done  
We're just damage done  
Need you to pull me out  
Pull me out  
To the neck  
To the neck  
Swear we won't cycle on  
One ends and ones just begun

Take one  
There's a million people in my head  
Another million people in my bed  
I think they nearly heard every word I said  
Every word I said

Dim cerulean  
You're like a phantom in the mist  
Or like a fog  
Corrupt my rhythm  
When you're lost  
You're like a limb that's disappearing  
Dim cerulean

We're just damage done  
We're just damage done  
Need you to pull me out  
Pull me out  
To the neck  
To the neck  
Swear we won't cycle on  
One ends and ones just begun

It's like staring at the sun  
I got nowhere left to run  
It's like staring at the sun  
And I got nowhere left to run  
It's like staring at the sun  
And I got nowhere left to

We're just damage done  
We're just damage done  
Need you to pull me out  
Pull me out  
To the neck  
To the neck

Swear we won't cycle on  
One ends and ones just begun

Take one  
There's a million people in my head  
Another million people in my bed  
I think they nearly heard every word I said  
Every word I said
