FLOAT

I See Stars

Numb and, and I'm slipping
When I'm alone and no one can find me
Now it's a black hole in front of me
Yeah, it's a black hole in front of me
Tempted by ignorance
Blissful eternally
And it's a wildfire guiding me
Yeah, it's a wildfire that's guiding me

I'm gonna call it off
It's written in the sand
The waves will wash away it all for good
I'm gonna call it off
It's better off this way
Return, I could for now, you never know

Float, I don't really wanna move
I'm not really having fun no more, fun no more
No, I don't wanna run no more, run

Feeling indifferent
Doubts on infinity
And it's an endless shadowing
And it's a crossfire inciting me

Numb and I'm slipping again
And it's a wildfire guiding me
It's guiding me off the edge, so I guess I'll

Float, I don't really wanna move
I'm not really having fun no more, fun no more
I don't really wanna run no more, run
So I guess that I will float, hate to say that I let go
I'm not really having fun no more, fun no more
No, I don't wanna run no more, run

I've watched the world, I've watched it change while I sleep
I get this feeling it's better off without me
I've watched the world, I've watched it change while I sleep
I get this feeling it's better off without me

I'm waiting for the echo
I gotta call it, got to call it off
I'm waiting for the answers
I gotta call it, gotta call it off
Off, off, off
Off, off, off
Got to call it off
Off

Float, I don't really wanna move
I'm not really having fun no more, fun no more
I don't really wanna run no more, run
So I guess that I will float, hate to say that I let go
No, I'm not having fun no more
No, I don't wanna run no more

Numb and, and I'm slipping
When I'm alone and no one can find me
Now it's a black hole in front of me
I'm gonna call it off
Yeah, it's a black hole in front of me
I'm gonna call it off
Numb and, and I'm slipping
When I'm alone and no one can find me
Numb and, and I'm slipping
When I'm alone and no one can find me
Now it's a black hole in front of me
Yeah, it's a black hole in front of me
