

Grass Before The Scythe

IAMX

I think I've gone down the tunnel
Of hyperfocus
Shiny new seduction
Gotta do my best to stay sober
Cause self-loathing gets messy as you get older

Why is it not possible to free
Fools from their stories?
Can we stop with all the masking and admit the defeat
Pay the price of our vanity

Come to the mountain we will make you safe
Or you'll be grass before the scythe, before the scythe
We can watch the world burning from a distance
You will be grass before the scythe, the scythe
Come to the mountain we will make you safe
You will be grass before the scythe
We can watch the world burning from a distance

Something like fetus in fetu
I was born wired to be split in two
But these false positive schizophrenic loops
Create movement
Are of use

Come to the mountain we will make you safe
Or you will be grass before the scythe, before the scythe
We can watch the world burning from a distance
You will be grass before the scythe, the scythe
Come to the mountain we will make you safe
You will be grass before the scythe
We can watch the world burning from a distance
You will be grass before the scythe
Come to the mountain we will make you safe
Ooh grass before the scythe, the scythe
We can watch the world burning from a distance
