

Circles

iann dior

I'm still trying to understand
How it feel to be alone again
Damn, if I can't have you then no one can
I wipe my tears with a hundred bands

We're running in circles till we crash and burn
In this life gotta live and learn
You know that I want cha, it ain't hard to see
Already knew you were bad for me

Is it true, everyday feel like the longest
So I can't wait on you, out of my mind
Girl, I lost it, it's true

But hold up, got a feeling things are better now
Girl, you know I'm trying to tie the knot
I'm hoping this time I have better luck
Pushing me away, well you better not

Cause I know everything about you
We descend into the chaos
I lost and I never want to
Never been the one to

Lose myself in every single way
You bring my doom
Nowadays I can't run away

We're running in circles till we crash and burn
In this life gotta live and learn
You know that I want cha, it ain't hard to see
Already knew you were bad for me

We're running in circles till we crash and burn
In this life gotta live and learn
You know that I want cha, it ain't hard to see
Already knew you were bad for me

When the flames go up, I watch it all go down
All the ashes on the floor, you can't save me now, no no
I did it and no, I'm not proud
But you always find another way to let me down

I'm not the only one doin' wrong, baby, you know
I'm still trying to find my way
Got a funny way of lovin' me, I hate how you show it
Stuck here in the same place

Lose myself in every single way
You bring my doom
Nowadays I can't run away

We're running in circles till we crash and burn
In this life gotta live and learn
You know that I want cha, it ain't hard to see
Already knew you were bad for me

We're running in circles till we crash and burn
In this life gotta live and learn
You know that I want cha, it ain't hard to see
Already knew you were bad for me
