

Oh my spaghetti
My love is up to 30
Oh baby tell me that you ready for me
Oh baby tell me if you ready for me
My love for you is fire
My love for you is fire

She like my disco yes
And we no go disconnect
She like my disco yes
And we no go disconnect
I'm too blessed to be stressed
Never had a low complex
Flows on check but the coast on rest
Got no sweat
Still colder than soviet and I know that
So I lay back and blow jet
My ex hit me up you don't even look for me
I told her baby I've been on to the next
And I've never ever been a mathematician so why the hell am I s
upposed to find X
So let bygones be bygones
The passing has passed
You drove me crazy and I never took the passenger class
I just burn it up and sometimes I ash in the glass
Took a sip and I forgot this how you got me so bad
I can't trust you for shit
But still I keep coming back to drop you a kiss
I've fallen in your pit and it's deeper than the abbys
My love for you is fire like beast

She like my disco yes
And we no go disconnect
She like my disco yes
And we no go disconnect

Baby come close
Let me talk straight to your ear
Give you love and affection no body can compare
I'm so rare and my fucking is top ten
So when we get connected nobody can unpin
Baby you the best I know
Never gone treat you like nobody
Follow me to the west side
Now you got the special love
