

Last One Standing

Icon for Hire

They always come for the wild ones
They always come for the freaks
I don't fit quite like they like it and now they've come for me
They always wanna change me
They wanna make me weak
I don't keep quiet like they like it and now they've come for me

An easy target, an easy mark
But how you think I got this far?
I'll turn to face you
Then I'll erase you
Before I do

I'll take this moment like I own it
Ain't seen the last of me
'Cause I will be the last one standing
Walk through the fire, it takes me higher
Ain't seen the last of me
'Cause I will be the last one standing

I won't let you kill me
Not like you could
They say you only die one time and I'mma make mine good
You think you got me cornered
But here's what you don't know
You didn't get the best of me
I saved that for myself

An easy target, an easy mark
But how you think I got this far?
I'll turn to face you
Then I'll erase you
Before I do

I'll take this moment like I own it
Ain't seen the last of me
'Cause I will be the last one standing
Walk through the fire, it takes me higher
Ain't seen the last of me
'Cause I will be the last one standing

They always come for the wild ones
They always come for the freaks
They always come for the misfits like you
Like you and me

They always come for the wild ones
They always come for the freaks
They always come for the misfits like you
Like you and me

I'll take this moment like I own it
Ain't seen the last of me
'Cause I will be the last one standing
Walk through the fire, it takes me higher
Ain't seen the last of me
'Cause I will be the last one standing
