

First Time

Icona Pop

I just can't stop thinking 'bout you
Rewind the time before I lost my mind
There was something special 'bout us
Remember when we thought it'd never end

Come on and run, run, run with me through the alley
Before we get old and all our friends start to panic

The first time we got high
The first time we got drunk
The first time we fell in love
And things will never be the same
And that's okay

I never forgot about you
Rewind the time before I lost my mind
There was something special 'bout us
Remember when we thought we'd never end

Come on and run, run, run with me through the alley
Before we get old and all our friends start to panic

The first time we got high
The first time we got drunk
The first time we fell in love
And things will never be the same
And that's okay
That's okay

Let's go to Paris, let's run away
Do all the things that we used to say
Let's go to Paris, let's run away
Do all the things that we used to say

The first time we got high
The first time we got drunk
The first time we fell in love
And things will never be the same
The first time we got high
The first time we got drunk
The first time we fell in love
And things will never be the same
And that's okay
