

## A Measure Of Insecurity

Icons of Filth

God is a measure of our own insecurity  
God is used as an incentive for us to kill  
To protect governments own security  
Security of their wealth and power and legalised crime  
The myth of god keeps us all in line  
To beg for forgiveness from something unreal, not there  
God is a con, god cannot care  
War's alright cos god justifies it  
But does god say this, does god exist?  
Or is god a lie used in governments piss?  
The voice of god is really the sound of government  
Masses have and will die for this great myth  
...Yet we'll still take the brunt  
God is a measure of our own insecurity  
We want life after death  
We are so afraid that we may be 'alone'  
And that the responsibility of past, present and future  
Lies with us alone  
Well, it does. And accept it we must  
We must let our minds be free  
And decide what is right or wrong individually  
You see, this means realising our moulded stupidity  
Religion plays a big part in the mind f\*\*king process  
We are all subjected to from an early age. Is it not  
Convenient that the Christian morality suits so  
marriage  
Like the requirements of the state? These ethics are  
Forced upon us at school. We are given no time to  
Question. And by the time we reach a stage where we are  
Quite capable of knowing perfectly well what we want,  
we  
Already firmly believe we want what we are told. This  
Indoctrination thus leaves us in later life with  
lessened  
Self belief and self determination. Surely it is time  
Enough for us all to question our own thoughts and  
Actions and decide for ourselves what we think is right  
Or wrong?... Individually.
