

## Asking Too Much

Icons of Filth

Angry that I may die by another's hand  
Feel sick that many may die 'cos of one command  
They wanna fuck us all up, god-given power as a cover-  
up  
God help me  
No reply, it's all a lie (their power comes from us)  
Chorus: GOD HELP ME. JESUS SAVE ME. PRIEST FOR-  
GIVE ME. LOVER SEE ME. 'ENEMY' LOVE ME.  
MOTHER FEED ME. FATHER SHOW ME.  
TEACHER LEARN ME. GOVERNMENT LEAVE  
ME... OR AM I ASKING TOO MUCH?

If that day will come, then I'm told I'll be alright  
Cos I've been taught to beg for forgiveness all my life  
Well, it better fucking work 'cos I hate crawling like  
a jerk  
Jesus save me  
Shit, I've been conned  
A respected place in the set up of the state  
Is a church with a man moralising others  
Pray or burn sisters and brothers, last rites as I die  
Priest forgive me  
Before you burn too  
CHORUS.....

In a world so sick with hate and war  
There's always someone I turn to for love and  
understanding  
Saw only each other, now die together  
Lover see me  
We blinded each other (see me for myself)  
CHORUS.....

As one last fling, all nations joined and began to sing  
Against those who'd sooner blow our dreams of peace  
away  
Far too late to save anything, time to decay  
'Enemy' love me  
But we should have loved sooner (it's not too late)  
Don't do this, don't do that, do this, do that,  
Eat meat and be strong like dad, cute and kept in a  
cage  
You can get used to oppression at a very early age  
Mother feed me  
Too late to grow my own (smother love)  
CHORUS.....

In history at school, always told of wars of past  
Got told to stay behind for falling asleep in class  
Pissed off with a blood stained system which just  
cannot last  
Teacher learn me  
Something useful for a change  
Greedy power perverted shits sitting high and mighty  
Dreaming of a place in history while slowly killing  
'blighty'  
You always dwell on the past and our future's just a

blast  
Government leave me  
'Cos with you there's no future to be had  
CHORUS.....
