

Lust

Ida Maria

Baby, you've been consumed
All about
Tryin to get me and you
In the dark
A family man like you
You're out of line
Such a sinful life
See your dirty mind

In the middle of the night
You keep on showing up
In your heart shaped likes
That you just can't stop
And I really don't mind
But your girlfriend might
In the middle of the night

I feel you looking at me slowly, up and down
You can't control it when the words come out your mouth
I know there's nothing but my body on your mind
You really shouldn't but you call me all the time

Tell me about your dream
Bet it's wild
Tension is so extreme
Make me cry
Baby let's say a prayer
Fold your hands
Close your eyes
Live a sinful life

In the middle of the night
You keep on showing up
In your heart shaped likes
That you just can't stop
And I really don't mind
But your girlfriend might
In the middle of the night

I feel you looking at me slowly, up and down
You can't control it when the words come out your mouth
I know there's nothing but my body on your mind
You really shouldn't but you call me all the time

Baby, I don't know
Where you've been hiding all my life
But you're a tiger in a jungle full of love
I'll be walking in the streets at night
Longing for your touch

In the middle of the night
You keep on showing up
In your heart shaped likes
That you just can't stop
And I really don't mind
But your girlfriend might
In the middle of the night

This is your captain speaking
No professional fucking on this flight
This is only for amateurs
The safeword is: Susan Boyle

How did we end up here?
On the floor
Make you scream for more
This is so hardcore

I feel you looking at me slowly, up and down
You can't control it when the words come out your mouth
I know there's nothing but my body on your mind
You really shouldn't but you call me all the time

Lalalalala...
You really shouldn't but you call me all the time
