

Alone

IDK

If you don't like me
Pick up your face from off the floor
Ditch all the hate your heart controls
That's just the basic part I know
And if you don't fuck with me
Here's some advice to off the load
Hide all your friends and all your hoes
They might just leave you all alone
All alone

I'm tryna get my hand up on her situation (the people)
Together we get heated like I'm huggin' Satan (the people)
I'm busy tryna figure out the path I'm taking (the people)
So I ain't got the time for all the gossip hating
Fossil fuel gassin' up your car
Ain't enough to take you very far, very, very far
So while you at the bottom tryna worry 'bout what I got (I got)
I'll be high, reaching for the stars

If you don't like me
Pick up your face from off the floor
Ditch all the hate your heart controls
That's just the basic part I know
And if you don't fuck with me
Here's some advice to off the load
Hide all your friends and all your hoes
They might just leave you all alone
All alone

I auto parallel park my new Beamer
As I reminisce when my teacher told me I would never know shit
Since I used to be a daydreamer
It's funny how the shit I dreamt about is the shit I'm livin' now
And all the math that I was supposed to learn isn't needed
So I'm like "Dear teacher, suck my penis"
They say that everything happens for a reason
Well my life's the definition, I'm the meaning

If you don't like me
Pick up your face from off the floor
Ditch all the hate your heart controls
That's just the basic part I know
And if you don't fuck with me
Here's some advice to off the load
Hide all your friends and all your hoes
They might just leave you all alone
All alone
