

# Financial AID

IDK

I just got outta school, now I gotta write another paper  
All I got is a dollar and a dream  
Life just forces me to wake up  
To reality, as I strive for a decent hourly  
But in reality, tuition cost more than a salary  
I'm expected to make  
You gotta go to school if you wanna be great, momma say  
And that wouldn't be a problem if you was the one who paid  
Feel like I got a lot of shit on my plate  
This food for thought is too much  
But I bet this weed will help me eat it up

Fuck my homework  
Fuck going to work  
I'm going to work with this weed nigga  
Fuck my homework  
Fuck going to work  
I'm going to work with this weed nigga  
I bet this sounds amazing if you're high right now  
I bet this sounds amazing if you're high right now  
I bet this sounds amazing if you're high right now  
I bet this sounds amazing if you're high

I just came back to school now I gotta take another test  
On top of that, I got a paper due 20 page no less  
Stress got me up all night  
Took an L sort of like the L taken on a board of chess by a knight  
By the time I'm done imma probably have more gray hairs than Grumpy on Snow White  
More [?] than catching a bus twice once more after catching it two times before  
Without a transfer before I graduate cause looking for job's easy, finding's a job ain't  
Found seven jobs [?] (say what?)  
One BAA is my degree (say what?)  
See I don't need no class, I know my math, there's zero jobs that want me  
I'm in a place where I'm forced to choose what I wanna do or I'm forced to lose  
And if I lose then I was forced to choose to go back to school so I can work for you  
I'm just tryna create my own shit by making my own hits then make my own money then go and invest it  
Then hire my own staff of the students that laugh when they heard I was dropping out of class

Fuck my homework  
Fuck going to work  
I'm going to work with this weed nigga  
Fuck my homework  
Fuck going to work  
I'm going to work with this weed nigga  
I bet this sounds amazing if you're high right now  
I bet this sounds amazing if you're high right now  
I bet this sounds amazing if you're high right now  
I bet this sounds amazing if you're high

I'm in class

Suppose that, when a customer purchases  $x$  units of one product,  $y$  of another, and  $z$  of a third, the utility of the purchased is given by this equation  
As I close my eyes
