Ayo

Every Ertrugrul Bay need a Halime Sultan  
To establish a tribe and build masjid roofs on  
My life, my sacrifice, my prayer, and my death  
Is all for the one God who spareth me breath  
You can try and lie to yourself about the times  
The war between God and Satan for hearts and minds  
In the age of social media  
Twitter, YouTube, Google, and Wikipedia, pearls get tossed to swine  
You stick with Dr. Fauci  
I'm running with Dr. Wesley  
I never let the CDC come and finesse me  
I never let the fake news from the press distress me  
Even though the Devil would love to Malcolm X me  
It's him again, with the tint skin tone preaching brimstone  
Until the Man of Sin get everything that was meant for him  
Just, know one thing  
And that's Allah sent me here to be a king
