

On Another Planet

Idlewild

I gave it to you
You took it away
Now there's nothing but ashes, dust and decay
Crumbling stone
I'm only part clairvoyant
Just don't ask me to remember
No one ask me to remember
It's as if that
All the world
Can see you there
Stand and stare
And we're on another planet
And all the world
Can see you there
Stand and stare
And we're on another planet
And all the world
Can see you there
Stand and stare
And we're on another planet
And all the world
All the world
You don't know the world
I gave it to you
You threw it away
All that wisdom from long ago
But everything's passing away
Passing away
We've got more in common than sorrow
More in common than sorrow
It's as if that
All the world
Can see you there
Stand and stare
And we're on another planet
And all the world
Can see you there
Stand and stare
And we're on another planet
And all the world
Can see you there
Stand and stare
And we're on another planet
And all the world
All the world
You don't know the world
