

Eternity

If I Were You

It's not enough, it's never enough
I've become so numb all over
I never thought it would be this tough
I'm just a ghost to you and nothing more
When you close your eyes, what do you see?
A fading memory

I want to feel
I want to feel you close
I want to feel
Feel you close to me
Close to me

Sing to me one last time
Dream of me
Don't let the clock run out on us tonight
Don't let the clock run out on us tonight
Don't let the clock run

I want to feel
I want to feel you close
I want to feel
Feel you close to me
I want to feel (I want to feel)
I want to feel you close
I want to feel (Want to feel)
Feel you close to me

There's an emptiness inside of me
Growing deeper with each step
Forget my name
Bury me, never to return again
Bury me for eternity

I want to feel
I want to feel you close
I want to feel
Feel you close to me
I want to feel
I want to feel you close
I want to feel
Feel you close to me
Close to me
Feel you close to me
Close to me
