

## Never There

### If I Were You

We are so alone  
Can we make it on our own?  
We are so alone

I always knew that there was something wrong  
Every story they told me was all a lie  
People suffering, the world is split in two  
You watch it all and leave us with nothing  
No hope, just despair  
No hope, just despair  
You watch it all, you left us with nothing

We are so alone  
With no one to save our souls  
Cutting through skin and bone  
Can we make it on our own?

Falling down so far below  
Waiting for the dark to swallow me whole  
Is this the end, am I finally free?  
Free of this misery?  
The light always seems to fade  
Every second I breathe is killing me  
God, can you hear me?  
I'm starting to realize you were never fucking there

All those helpless cries, all those lost in their way  
So many useless lies, you fucking turned away  
All those days gone by  
How could you do this to us?

We are so alone  
With no one to save our souls  
Cutting through skin and bone  
Can we make it on our own?  
We are so alone  
With no one to save our souls  
Cutting through skin and bone  
Can we make it on our own?

Looking for an answer, even a sign  
Truth is, we are left behind  
You are nothing but a fucking ghost  
You failed us when we needed you the most  
The sky is an empty void  
All our hope, nothing but destroyed, fuck
