

Black Garden

IGNEA

Black flower blooms inside of me
Devouring other colors
I forgot how should it be
Nobody stops me

They feed it with their detestation
My arms turned black

Yesterday I found my hope
Bleeding in the distant corner
I couldn't see its suffering
And did a fatal shot

Follow me, follow me
To the Black Flowers Garden
Join my new society
We are parts of a common
Universe, follow me
I will be your sacred gardener
Here we are. this is your place
Love me, 'coz we love each other

Follow me, follow me, follow me
To the Black Flowers' Garden
I'm the Ruller and I'm that Fallen
Angel turned into the Dragon

You are not alone
Knock into my world
We dissolve in black love
The next step to evolve
I'm drawn to you
Again and again
This madness does
Not have the end
I'm the unblown
Insipid pod
Color me
With your poisonous blood

Colored with my black love
Colored with my black blood
