

The sky is crushing above our mindless heads  
The star falls over snowy meads  
Near-dead messiah from planet number four  
Lies near the capsule that is torn

He will bring us to the skies  
And grounds untouched for so many years  
He is the child of greatest lies  
There is the life on Mars, I know, I hear it there  
I feel, believe

His name is Yuri, he's born as the last hope  
The sole alive which truth reveals  
He knows the secret like gorgeous firebird  
The home is what in your heart lives

He will bring us to the skies  
And grounds untouched for so many years  
He is the child of greatest life  
There is the life on Mars, I know  
Why don't you still believe
