

# Time After Time

ILIRA

When your head and heart are saying "no"  
I'll be there to hold you through the night  
I'll always be there by your side  
Yeah, time after time

A shooting star across the sky  
I'll tell you all that's on my mind  
I don't know why I've been so blind  
To all the signs, mmm

I'm out of my depth but I've gotta start living  
And I'm feeling scared but this time it's all different  
Was fighting against it but you're all I've been missing  
In highs and lows want you to know that

When your head and heart are saying "no"  
I'll be there to hold you through the night  
I'll always be there by your side  
Yeah, time after time  
Oh, when the darkness falls on you  
There's not a thing I wouldn't do  
I'll always be right there by your side  
Yeah, time after time

I feel like there's a part of me that breaks  
A little every time you go away  
I never cared, was numbing my brain  
Then you walked in and everything changed

I'm out of my depth but I've gotta start living  
And I'm feeling scared but this time it's all different  
Was fighting against it but you're all I've been missing  
In highs and lows want you to know that

When your head and heart are saying "no"  
I'll be there to hold you through the night  
I'll always be there by your side  
Yeah, time after time  
Oh, when the darkness falls on you  
There's not a thing I wouldn't do  
I'll always be right there by your side  
Yeah, time after time

(Time after time)  
Yeah, time after time
