

Into The Dark

Illenium

What's it like to wake up
With those voices
In your head?
Over and over again
Is it hard to carry
All that poison
In your hands?

Once you hide me from your pain
Is it lonely out in the cold?
When all of your lights start slowly fading
That's when I carry you home

If they tear you away
I'll follow
I'll follow you
Into the dark, light the way
I'll follow
I'll follow you

Into the dark
Into the dark
Into the dark
Into the dark
When they tear you from me
I'll follow
I'll follow you
Into the dark
Into the dark
Follow

What's it like to wake up
With those noises
In your head?

Once the exit music's playing
If you're out there all on your own
When all of the lights start slowly fading
That's when I carry you home

If they tear you away
I'll follow
I'll follow you
Into the dark, light the way
I'll follow
I'll follow you

Into the dark
Dark
Into the dark
Dark
I'll follow you
Into the dark
Into the dark
Follow
