

# Sideways

Illenium

Head on the dashboard  
I can see that your heart is breaking  
I wish, wish I could fast forward  
Take all of your pain and erase it

Feet on the ground, feet on the ground  
Even when we're upside down  
Running around  
But we'll never fall in now

If the world is going sideways  
I know my place is here with you  
When all our good nights turn into dark days  
I know I'll stay next to you  
When your hope's gone, can barely hold on  
When your sky is running out of blue  
When the world is going sideways  
I'll be sideways, sideways here with you  
Oh  
Sideways here with you

When the world is going sideways  
I'll be sideways, sideways here with you

Sideways here with you  
Oh, sideways here with you  
Sideways here with you

Don't disappear  
You know all of your bad news won't be news to me  
Echoes, all I hear  
Scared of findin' nothin' where you used to be

Feet on the ground, feet on the ground  
Even when we're upside down  
Running around  
But we'll never fall in now

If the world is going sideways  
I know my place is here with you  
When all our good nights turn to dark days  
I know I'll stay next to you  
When your hope's gone, can barely hold on  
When your sky is running out of blue  
When the world is going sideways  
I'll be sideways, sideways here with you  
Oh  
Sideways here with you  
Oh

When the world is going sideways  
I'll be sideways, sideways here with you

Sideways here with you  
Oh, sideways here with you  
Sideways here with you  
(Oh, sideways here with you)
