

Mirror

Illy

I been living with your ghost, and then I get a text, say you thought of me
I know we been here before, but now I don't expect an apology
Cause I don't want to waste more time, lord knows we tried, this fire ain't
because of me
I can only hope one day you find out who you wanna be

I wish that you could remember
When you asked me
What it takes to get this far
You make it sound like forever
Is a bad thing
And I'm trying too damn hard
So take a look in the mirror
In the mirror
For the you you're looking for
Just take a look in the mirror
In the mirror
If you're so unsure
Just take a look in the mirror
Just take a look in the mirror

On the wall, you the fairest of them all
Every time I leave, wish I never got involved (no)
Fairytale got us wishing on a star
But I can't be the only reason when it fall apart
No no I know, bitter pill to swallow
You know I know, used to be wherever
You go I go, once upon a time
But time ain't on our side, and I wish

I wish that you could remember
When you asked me
What it takes to get this far
You make it sound like forever
Is a bad thing
And I'm trying too damn hard
So take a look in the mirror
In the mirror
For the you you're looking for
Just take a look in the mirror
In the mirror
If you're so unsure
Just take a look in the mirror
Just take a look in the mirror
Just take a look in the mirror

Used to always say
That when our time came
We'd run and never and look behind
But then one gets blamed
And the whole thing change
Into something we don't recognise
See the red lights flashing, we can read the signs
I'm in over my head, trying to read your mind
And I know, I know it's my fault as well
But I can't save you from yourself

I wish that you could remember
When you asked me
What it takes to get this far
You make it sound like forever
Is a bad thing
And I'm trying too damn hard
So take a look in the mirror
In the mirror
For the you you're looking for
Just take a look in the mirror
In the mirror
If you're so unsure
Just take a look in the mirror
