

# Satellites

Illy

They found us drifting in deep space  
Way beyond the outer limits  
Didn't know 'til I was in it  
But I never felt more at home  
Always be the one that got away  
And from over the horizons  
I can feel your skin on my skin  
In a world I used to know

And even when I can't find you amongst the stars  
I still find you somewhere out there in the dark

So I'll be your satelllite  
I can't be your world but I'll be near  
All of the sacrifice  
Don't it seem so small from way up here  
Take me to paradise  
Feel it all before we disappear  
And I'll be your satelllite  
I can't be your world but I'll be near  
I can't be your world but I'll be near

Yeah  
Maybe I'm a flight risk  
Hit me like a comet her touch send me into orbit  
On sight it's going down without an eye test  
I can't keep my hands up off her  
She don't come around here often nah  
Make me numb  
Whats a launching to a nosebleed?  
Take the plunge  
You can only jump with both feet  
Light me up with that supersonic-girl speed  
Fast life No sleep, No love  
No need

Let us crash and burn  
Exploding in the night  
Supernovas splashed for light years through the sky

I'll be your satelllite  
I can't be your world but I'll be near  
All of the sacrifice  
Don't it seem so small from way up here  
Take me to paradise  
Feel it all before we disappear  
And I'll be your satelllite  
I can't be your world but I'll be near

I'll be your satelllite  
I can't be your world but I'll be near  
All of the sacrifice  
Don't it seem so small from way up here  
Take me to paradise  
Feel it all before we disappear  
And I'll be your satelllite  
I can't be your world but I'll be near
