

Space Cowboy

Ilse DeLange

They're suspicious of the fast track crazy girl
Never thought she'd go there, guess no one really knows her
But she was ready for her new day danger zone
Where there were no safeties, no expectations known

She built a rocket ship, fueled up a mind made sky
Stardust on her boots, a laser gun that shoots
Packed up her saddle bag, looked up and said goodbye
As she fired up her brushed steel rocket ride

She looked into his moonlit baby blues
Held out her hand and said, tonight you gotta choose
And she said

Space cowboy, come and ride with me
Space cowboy, ride my galaxy
Into the great unknown, the endless skies
Jupiter has got me hypnotized, I said
Space cowboy, come and ride with me

Now we'll be chasing all the steel horse rodeos
Find our new horizon, beyond the fallen skies and

We'll set fire to a sun storm power show
And we'll live forever and in the dark we'll glow

And you will be my sidekick with the silver spurs
Our power will electrify the universe
And she said

Space cowboy, come and ride with me
Space cowboy, ride my galaxy
Into the great unknown, the endless skies
Jupiter has got me hypnotized, I said
Space cowboy, come and ride with me

Into the great unknown, the endless skies
Jupiter has got me hypnotized

Space cowboy, come and ride with me
Space cowboy, ride my galaxy
Into the great unknown, the endless skies
Jupiter has got me hypnotized, I said
Space cowboy, come and ride with me

Space cowboy
Space cowboy
Space cowboy
Space cowboy
