12=3
A line wrapped around a string
Girls in the classroom
Concentrate, boy

A line around gravity Spiritual individual Corrosion and humanity The mathematics of love and the science of sanity

Living it up in the atmosphere Nobody dies if the heart is here

Kiss me goodbye
For the doctors are comin'
We all know why
Because I wasn't born

Here we go again
As time passes by here
We don't live and lie here
We're all going to die in the end

Standin' on the corner Holes in my shirt Girls drivin' by Oh come here, don't flirt

'Cause she's never had a girlfriend And I don't want one either And I don't want the people Knowin' that I was smoking ether

I've been thinking about science
In my spare time
I've been thinking about the reason
To the rhyme, heck, yeah

Livin' it up in the atmosphere Nobody dies if the heart is here

Kiss me goodbye
For the doctors are comin'
We all know why
Because I wasn't born

Here we go again
As time passes by here
We don't live and lie here
We're all going to die in the end

Kiss me goodbye
For the doctors are comin'
We all know why
Because I wasn't born

Here we go again

As time passes by here
We don't live and lie here
We're all going to die in the end

Rock science And people talk, talk science And people see stars sometimes And some people raise cadavers

But not me, I see
The sun is made of string
Lights out from the underworld
People talk about God

Are they insane? I don't think so I say they're maybe spreading some love
