

I Am The Son

Ima Robot

Steppin' out with candy bars
And bloody lips on sidewalk stars
And I know I should stop but I don't

And I have good thoughts but they get ignored
And I know I should stop as the ice melts in

I can't eat and she can't sleep
There goes the sound of low downtown
Hey, white boy, whatcha doing round here?
Yeah, figure it out
Is this your year?

Yeah, this is it, that's for sure
This is what we've been waiting for
And now I'm back again
Let the games begin, yeah
Time and space of forgotten lore
This is what we've been waiting for
Suck me up and take me in
Let the games begin

Takin' a ride like lovers do
I'm breathing the air like I don't care
Turn around now, the time has passed you by
Bite your nails and pick your nose
We'll see how long you can keep that up
It's hot out and you're wearing a full-piece suit
Well take my shit cuz I don't mind

I'm leaving my skin for another man
Yeah, I'm walking, now, on solid land

Yeah, this is it, that's for sure
This is what we've been waiting for
And now I'm back again
Let the games begin, yeah
Time and space of forgotten lore
This is what we've been waiting for
Suck me up and take me in
Let the games begin
