

Step Right Up

Ima Robot

Ima Ima this, Ima Ima that
Now, back up, back up, back up, back up
Ima Ima this, Ima Ima that

This is some advice to save your life
Get out the game, or face your death
Evolution - the fit survive
I ain't hatin', I just don't tell lies

Mmm, get your fame, get your cash
Now pray to God they don't get your ass
Get your mind right, get your mind right
It's a limelight

It's a new age
Oh, you won't survive here
I'm worrying now to hide
Come on, super boys, super girls
If you help, we can, we can keep it alive

Building an empire, build it with dreams
Set it on fire, baby, don't look back
Living in a world of bombs and me
Taking 'em out in my new millennia (get ready!)
'Cus here I come (throw your hands up!)
'Cus here we come

End of world, end of days
Clean 'em out, 'n start fresh
From angry blacks, to greedy whites
The sun burns, the world turns
If you hate to live, live to love
We all will die, so no fear
It's not what you want, but what you need
Live it up, Godspeed

New age
Oh, you won't survive here
I'm worrying now to hide
Come on, super boys, super girls
If you help, we can, we can keep it alive
