

Every Breath

Imminence

I don't even know where to start
Why can't I be the beat in my heart?
Taking that first step is the hardest part
I need you to be that start

It starts with you
It starts with you

Every breath, every step
Every time that I loose myself along the way

Your steps are vast
Your pace is so fast

It starts with you

Every breath, every step
Every time that I loose myself along the way
It starts with you
Every breath, every step
Every day that I cross my hands and pray

Every breath, every breath
Every step, every step
Every time, every day

Women and children last
The dices has been cast
Leaping head first
You're an example at worst

Every breath, every step
Every day that I cross my hands and pray

I don't even know where to start
Why can't I be the beat in my heart?
Taking that first step is the hardest part
I need you to be that start

It starts with you
It starts with you

Every breath, every step
Every day that I cross my hands and pray
Every breath, every breath
Every step, every step
Every time, every single day

Your steps are vast
Your pace is so fast
Leaping head first
You're an example at worst

It starts with you

Every breath, every step
Every time that I loose myself along the way

It starts with you
Every breath, every step
Every day that I cross my hands and pray
Every breath, every step
Every day that I cross my hands and pray

With every hour gone past
More like you have been massed
Let me believe in God
You're nothing but snakes in the grass

Let me believe in God
You're nothing but snakes in the grass
