

Goreverture

Impaled

At Saint Julian's Medical University

Four ambitious students are taking experiments into the nature of death a bit too seriously

(Death after life)

Driven by an unquenchable thirst for knowledge, they will live by the scalpel and cut down those who get in their way.

(Death after life)

Experiments in murder, their aim is to answer the question - Is there a cure for death after life?

(Death after life)

Death after life...if you're lucky enough to die, pray that you stay dead.
