

## Light It Up

Impellitteri

Stand up and shout and put your fist into the air  
It's time to rock and roll the greatest band you'll hear  
We hit the stage and then we rock you through the night  
We play our songs to a million fans alike

In the spotlight you can feel the energy  
The audience will lift you high

Light it up, fire in the sky  
When the lights go down and the music comes alive  
Light it up, fire in the sky  
Hold your horns up high as you're screaming in the night

Always a fantasy to see you face to face  
A vivid memory that no one can replace  
As we roll down the road to slay another town  
We're never coming back, we're never slowing down

In the spotlight you can feel the energy  
The audience will lift you high

Light it up, fire in the sky  
When the lights go down and the music comes alive  
Light it up, fire in the sky  
Hold your horns up high as you're screaming in the night  
Light it up, fire in the sky  
Everyone unite in this moment of our lives  
Light it up, fire in the sky  
It's the best of times when you spread your wings and fly  
Light it up, fire in the sky  
When the lights go down and the music comes alive  
Light it up, fire in the sky  
Hold your horns up high as you're screaming in the night  
Light it up, fire in the sky  
Everyone unite in this moment of our lives  
Light it up, fire in the sky  
It's the best of times when you spread your wings and fly
