

# We Will Remember

## In Flames

We have come so far  
Crawled through knives and artifacts  
We had a purpose and a reason  
Behind space and time

Ignore the fixed ideals  
Serve your restless soul  
Dedicated to all that's sacred  
Measuring noise and sound

Reach a brand new level  
Watch the worlds collide  
Set yourself on fire  
As we remember this forever  
We remember this forever

When the sky is clear we will remember  
Through thick and thin we won't surrender  
As the years pass, the memories still last  
When the sky is clear we will remember

Calling our gathered masses  
From the colony to the hives  
I have come to realize  
(This is) not an ordinary story

We're on a highway  
Nothing left to lose  
Set yourself on fire  
As we remember this forever  
We remember this forever

When the sky is clear we will remember  
Through thick and thin we won't surrender  
As the years pass, the memories still last  
When the sky is clear we will remember

When the sky is clear we will remember  
Through thick and thin we won't surrender  
As the years pass, the memories still last  
When the sky is clear we will remember

When the sky is clear we will remember  
Through thick and thin we won't surrender  
As the years pass, the memories still last  
When the sky is clear we will remember
