

At Her Side

In Legend

She smells the rain before it touches my skin
She can hear single drops falling down
Shouts out my name into the hard blowing wind
She's the sail, braves the storm, feels the ground

Come on
Singing an angel this sweet melody
Come on
Sing with me all along
She's the rhythm - the groove underneath
Sing with me - sing along!

Of all the girls she's more than just one of them
She's the bright side of life - wild at heart
How would I like to let her know I feel safe
At her side when it rains way too hard

So come on
Singing an angel this sweet melody
Come on, sing with me all along
She's the rhythm - the groove underneath
Sing with me - sing along!
Sing with me - sing along!

And the priests keep praying lies
No matter what it takes -
Her faith is her self-created guide
Not the rain - not the blame
Nothing pulls her down
To me the more they pray - the more they say
Her shelter makes my day
She's an independent natural
The bright side of my life - wild at heart!

She smells the rain before it touches my skin
She can hear single drops falling down...

So come on
Singing an angel this sweet melody
Come on, sing with me all along
She's the rhythm - the groove underneath
Sing with me - sing along!
Sing with me - sing along!
