

Dear Diary

In Stereo

Dear diary today
It feels like the stars so far away

When the world around is crashing down
Like waves against the tide
And your heart can't take another hit
Fighting wars inside your mind

Just know that the wars worth fighting
And it's still worth trying wipe the tears your crying
Hold your head to the sky and you'll make it to the other side
If you need someone to fight your battles
I'll be standing right here beneath the shadows

Dear diary today
It feels like the stars are so far away
She's barely hanging on but not for very long
Please don't fly away
(Please don't fly away)

When you feel like your dreams are breaking
At the seams and you've got so far to go
Come away to a happy place when you hear this on the radio
If you need someone to fight your battles
I'm standing right here beneath your shadows

Dear diary today
It feels like the stars are so far away
She's barely hanging on but not for very long
Please don't fly away

Beautiful soul don't fly away
Cause you mean everything to me, you mean everything to me
Beautiful soul don't fly away, yeah

Dear diary today
It feels like the stars are so far away
She's barely hanging on but not for very long
Please don't fly away

Dear diary today
It feels like the stars are so far away
Just keep holding on your stronger than you know
Please don't fly away
(Yeah)
Please don't fly away please don't fly away
Please don't fly away please don't fly away

Please don't fly away
