

Never Felt This Good

In Stereo

I don't mean to judge
But I never see you wearing a smile
You're talking way too much, yeah
About how you haven't felt in a while, ooh yeah

Feeling numb, feeling blue, it's contagious
Getting worse around you, getting dangerous
I know, you know, I can love you better than him
I know what you're needing

Baby, understand that I'm here if you need me, need me
Pretty lady, I could be the one to get you feeling
Your heart ain't never felt this good
Never felt this good
Your heart ain't never felt this good
Never felt this good
Your heart ain't never felt this good

Let's find out how you're feeling, doing
If god's tryna drive you to the ceiling, listen
I'm not tryna bring you down
Just tryna make you come around
Turn this spark into fire, lighter
Take our love, your desire's higher
I'm not tryna bring you down

Feeling numb, feeling blue, it's contagious
Getting worse around you, getting dangerous
I know, you know, I can love you better than him
I know what you're needing

Baby, understand that I'm here if you need me, need me
Pretty lady, I could be the one to get you feeling
Your heart ain't never felt this good
Never felt this good
Your heart ain't never felt this good
Never felt this good
Your heart ain't never felt this good

Feeling numb, feeling blue, it's contagious
Getting worse around you, getting dangerous
I know, you know, I can love you better than him
I know what you're needing

Baby, understand that I'm here if you need me, need me
Pretty lady, I could be the one to get you feeling
Your heart ain't never felt this good
Never felt this good
Your heart ain't never felt this good
Never felt this good
Your heart ain't never felt this good
