

# The Speed Of Sound

In Stereo

There's a million different words  
That I could sing to you  
(I could sing to you)  
All the songs that I wrote, they don't mean anything  
If you don't want them too  
(if you don't want them too)

Do you know that I feel so far away?  
(far away, far away)  
And I won't let go of yesterday  
(yesterday, yesterday)  
Do you know just how a heart can break?  
'Cause I don't know how much I can take  
And you know that I won't be afraid  
Now you got me on the air drop

Fall, falling to the ground  
But you can't help me now  
You're way above the clouds  
I'm trying, trying to reach you now  
But I can't work out how  
I'm falling at the speed  
The speed of sound

A cement-feathered bird  
Could fly just like a Phoenix  
But everytime that I try  
You just don't wanna see it  
The impression I get is  
You just don't care about me  
The reflection that's left  
Girl, I can't see you around me

Do you know just how a heart can break?  
'Cause I don't know how much I can take  
And you know that I won't be afraid  
Now you got me on the air drop

Fall, falling to the ground  
But you can't help me now  
You're way above the clouds  
I'm trying, trying to reach you now  
But I can't work out how  
I'm falling at the speed  
The speed of sound  
The speed of sound  
The speed of sound

I'm falling at the speed  
The speed of sound  
The speed of sound  
The speed of sound

I'm falling at the speed  
The speed of sound

I'm fall, falling to the ground

But you can't help me now  
You're above the clouds  
I'm trying, trying to reach you now  
But I can't work out how  
I'm falling at the speed  
The speed of sound

I'm fall, falling to the ground  
But you can't help me now  
You're above the clouds  
I'm trying, trying to reach you now  
But I can't work out how  
I'm falling at the speed  
The speed of sound  
The speed of sound  
The speed of sound  
...
