

# With Your Love

In Strict Confidence

I guess, fast places  
Where i go, you feel the vibes  
We is, yes we is. You and I, we crossed the line

Then at the end of the day. when the light is on  
meet me at the place  
carry on,  
my friend

Deep in my soul, your world is all mine, yeah  
come let it shine  
help me from falling, I want to stay real

the leaves fall in silence

clouds are coming, and the people are gone  
I feel so useless when it's time to go

all that is real, all that I feel  
just leads to you

I'm using my senses to escape from this  
I'm safe, i don't need to resist  
To the light that lights up your face

Deep in my soul, I'll never let you go, no no no

this dream is so perfect, your mind  
when time is all

Deep in my soul, your world is all mine  
come let it shine

help me from falling, I want to stay real  
your world is all mine

Don't want to let you go

Here inside my heart, I'll never make you cry  
feel the warm of the setting sky  
you can't deny, I'm still with your love

I'm still with you living in my heart  
down inside  
I'm still with your love  
I'm still with your love

Still with your love, still with your love

I'm still with your love  
I'm still with you, still with you

Still with your love, still with your love

I'm still with your love
