

Host/Parasite

Incendiary

Mass displacement
From a homeland tainted
Scars are burned into
This rotting landscape

Desert, desert
Desert maker
Traitor, traitor
Broke the vows made sacred

Barren lands where the life's been drained
The earth's been cracked and the fields are stained
There's a poisoned thirst from the scorching rays
Soaked with acid rain
Desert maker

Mass displacement
From a homeland tainted
Scars are burned into
This rotting landscape

Desert, desert
Desert maker
Traitor, traitor
Broke the vows made sacred

Killing what sustains us
Defying what will save us

It's all too late

We will steal
We will ache
We will starve
We will break

We will steal
We will ache
We will starve
We will break

The last sun has set

We will steal
We will ache
We will starve
We will break

The last sun has set
