

# Poison

Incendiary

Got a thousand mile stare  
Looking back  
I remember what it's like  
To walk the tracks  
'Cause we go off course  
And we lose our way  
But it's a bright white light  
At the end of the day

Gain a year, lose some hope  
Got a lump in my throat  
Stay up or sink below  
Gain a year, lose some hope  
Got a lump in my throat  
Stay up!

A frozen brain can paralyze the truth  
Melt it 'til the soul starts leaking through

Handshakes drop and calls go missed  
"See you soon's" turn to "meant to give's"  
Conversation with familiar sounds  
You just like letting me know  
You're still around  
Handshakes drop and calls go missed  
"See you soon's" turn to "meant to give's"  
Conversation with familiar sounds  
You just like letting me know  
You're still around  
I'm still around

Get yourself on a higher level  
Break the plane and I'm with you whenever  
Get yourself on a higher level  
Break the plane and I'm with you forever

I watch the ones I love  
In their search for peace  
They can't understand  
What they were meant to achieve  
I watch the ones I love  
In their search for peace  
Why can't you understand  
You got everything
