

To Be With You

Incognito

Nothing says I love you like I love you
It's simply what I want to say to you

Whatever it was that you did
You just need to keep on doing it
'Cos when you touched this lonely heart of mine
You gave me a brand new start
The feel of your touch is heaven
And your love means the world to me
The most beautiful things, the moon and the stars
They've got nothin' on you

No ifs and no buts, I couldn't stand to the side
Take the risk and loose you
Had to get you into my life

Stay, won't you stay, baby stay, nothing is better
No feeling is greater, than to be with you
Stay, won't you stay, we can play, when we're together
No feeling is greater, than to be with you
To be with you

From the first time I laid eyes on you
I just knew that you were meant for me
Oh no, I can't help myself wanting you
Had to hold you and make you mine

Nothing says I love you like I love you
It's simply what I want to say to you
