Lighthouse

Infected Rain

Our thoughts and emotions generate a certain energy that interacts with the universe
And that this energy can be harnessed to bring about our desired outcomes
By aligning our intentions and desires with this energy
We can create a reality that is in harmony with our goals and aspirations

Be strong, don't give in
Stay devoted to your dream
This dance can have your favorite rhythm
If only you could use what you were given

It's time to realize
The power of your thoughts and rise
Every thought and every deed
Will bring you, bring you what you need

Dear friend, don't you see the stars above?
A vast universe of endless love?
It all begins within your mind
With thoughts that shape what you will find

Surf this endless galaxy
Create your own reality

Be strong, don't give in
Stay devoted to your dream
This dance can have your favorite rhythm
If only you could use what you were given

Emotions

I know you feel lost, adrift, alone
Looking for a lighthouse you've never known
Fear keeps crashing on your shore
Pulling you away from home

Reality

It's time to realize
The power of your thoughts and rise
To a life of endless inspiration
A journey towards your creation

Be strong, don't give in
Stay devoted to your dream
This dance can have your favorite rhythm
If only you could use what you were given

Surf this endless galaxy
Create your own reality
Surf this endless galaxy
Create your own reality

Surf in this endless galaxy
Create your own, create your own reality
Surf in this endless galaxy
Create your own, create your own reality

Be strong, don't give in
Stay devoted to your dream
This dance can have your favorite rhythm
If only you could use what you were given

Surf this endless galaxy
Create your own reality
Surf this endless galaxy
Create your own reality
Surf this endless galaxy
Create your own reality
Surf this endless galaxy
Create your own reality
