Never the Same

Infected Rain

Take me back!
Turn around the clock
Take me back!
I can't stand the tick-tock
Take me back!

Let the sound feel like forever
An endless moment in the new era!

Hovering in the stardust
In all this glam we get lost
Happy, naked and mutated
A new version of the world is created

When the song becomes infinity
A pleasure of healing becomes an eternity
I miss laughing and crying for hours
Healing up and building strong towers
Holding each other in sorrow
Are we really fated to fail tomorrow?

Happy, naked and mutated
A new version of the world is created

Hovering in the stardust
In all this glam we get lost!

Time is never the same again!
It's cruel but, we need it like oxygen
So cast away the thoughts about the past
And stop hovering in the stardust!
