

Walking Dead

Infected Rain

What you seek is what you're going to find
Be careful with what possesses you and your mind
You choose this hell you're living in
Now choose the world you want to stay in

You have to decide what to do
With the time that was given to you
With your time
Carry on like the walking dead
Or sober up and avoid the bad ending

Foolishness and ignorance are blinding you
Can't you see that the drink is controlling you?
You're ending your existence with your own hands
Soon you'll be alone, no family, no friends

Look at me and tell me, are you ready?
Have you cooled down? Is your heart steady?
Stop self-medicating your depression
Suck it up and deal with your addictions

From the top of my lungs and the bottom of my heart
I'm screaming, I'm begging, I'm begging you to stop
Stop
Stop falling down, you're digging your own grave
People care for you, get out from your cave
Stop

You have to decide what to do
With the time that was given to you
With your time
Carry on like the walking dead
Or sober up and avoid the bad ending

Look at me and tell me, are you ready?
Have you cooled down? Is your heart steady?
Look at me and tell me, are you ready?
Have you cooled down? Is your heart steady?
