

# Don't Be Afraid

Informatik

There are times  
when the world feels like its closing in on us  
There are times  
When our doubt and fear can get the best of us  
Its not so surprising  
It feels like youre dying  
The moment when everything starts falling apart  
You dont realize it  
but you can survive it  
The only thing you need to do is  
follow your heart

Dont be afraid  
In the morning you will know  
you wont feel this way for long  
Im saying..

Dont be afraid  
See how far that youve come  
you have only just begun to make it

You will find  
there is more to you when you begin to try  
you will find  
that life's hardest part becomes your favorite times  
Just keep your eyes set  
on the horizon  
even when everything is falling apart  
You wont need reminding  
or require guiding  
as long as you remember just to  
follow your heart

Dont be afraid  
In the morning you will know  
you wont feel this way for long  
Im saying..

Dont be afraid  
See how far that youve come  
you have only just begun to make it

Dont run away  
dont hide inside  
Dont dig a hole  
jump in and close your eyes  
Theres a stand to make  
you got a chance to take  
dont let it slip away now  
everything bends before it breaks  
(X2)

Dont be afraid  
In the morning you will know  
you wont feel this way for long  
Im saying..  
Dont be afraid

See how far that youve come  
you have only just begun to make it  
(x2)
