Get up Away from That Thing

Information Society

Get up away from that thing
And move to the obscure rhythm
Get up away from that thing
Try to get out of their reach

Get up away from that screen
And create a look of your own
Get up away from that screen
Create a life of your own

Untie yourself from that tube
And move in a way they can't fathom
Get up away from that thing
There's more to the world than they show you

Get out from under that thing
And move to the obscure rhythm
Get out from under that thing
Try to get out of their reach

Get up away from that screen
And create a look of your own
Get up away from that screen
Create a life of your own

Untie yourself from that tube
And move in a way they can't fathom
Get out from under that thing
There's more to the world than they show you
