

Girl Got A Gun

Inglorious

They say the devil's in the details
They say that hell is all around all the time
Dangerous to tell you
People never seen her cry
And when they ask me how I know her
You must give this door a plead
Lady won't love you forever
If you met her on the street

She's a gun on the run
And she's already won

She's a bad girl she knows what she's done
She don't need to play dumb
She's no fool
Watch her closely and you'll see
As she waves through the street
She will kill take my way
She's the one that girl got a gun

Find her on west when news around see
She lives a life where she goes hustle town to town
She got those kids that don't know their daddies
Don't look for them because they are hell bound

She's a gun on the run
And she's already won

She's a bad girl she knows what she's done
She don't need to play dumb
She's no fool
Watch her closely and you'll see
As she waves through the street
She will kill take my way
She's the one that girl got a gun

She's a gun on the run
And she has already won

She's a bad girl she knows what she's done
She don't need to play dumb
She's no fool
Watch her closely and you'll see
As she waves through the street
She will kill take my way
She's the one that girl got a gun

She's a bad girl she knows what she's done
She don't need to play dumb
She's no fool
Watch her closely and you'll see
As she waves through the street
She will kill take my way
She's the one that girl got a gun
