

Slide Out The Window

Inhaler

Oh I live with the world
Like you would with an ex
I'm checking in
Where she's checking out next
She makes moves
Deep in my head
Burning a hole
Right down in my chest

Like the morning
Just slide out the window
Till the dawning
Just slide out the window

She waits for the end
Wearing a sundress
We were growing up
Now we're growing apart

Like the morning
Just slide out the window
Till the dawning
Just slide out the window

You gotta slide
Oh you gotta slide
You gotta slide
You gotta slide

When seasons change
And it gets dark
We'll own sunrise
Hold your breath
And cross your heart
I'll take you there

Like the morning
Just slide out the window
Till the dawning
Just slide out the window

You gotta slide
You gotta slide
You gotta slide
You gotta slide
