

## Divergence

### Inherit Disease

Stemming from beliefs it begins  
Sides are taken, moral corruption ensues  
An apocalyptic war follows  
Mans inability to reason  
There will be a world scale slaughter that  
Completely severs the connection between sides  
For one has the aid of technology and will prevail  
Time will pass, knowledge will grow  
As will depravity  
Hate, fueled by pain replaces kinship  
And overrides rationality  
Eventually the reasons that have created the  
Catastrophic divide will be forgotten and  
the 'naturals' will be left fighting for scraps  
In a wasteland of godless barbarity  
Religion is the great plague of man  
Science is the cure through utilization of  
Technology
