

## Lie & Defy

Injected

Well, we all want something to keep  
Life covered with care  
Health fighting with fate  
So we'll lie and defy  
I can feel you all slipping away

Well, I came and nothing left  
Wish something of feeling, can't seem to shake  
So we'll fade and betray  
Paranoid, it's a tough habit to break

Well, we all want something to keep  
Life covered with care  
Health fighting with fate  
So we'll lie and defy  
I can feel you all slipping away

We are the dreamers on it  
Fingering the line and it tastes so wrong  
Can you take anymore?  
You just don't know

You can get what you always wanted  
Set you ablaze and watch you burn  
You double your praise and can't answer

We are the dreamers on it  
Fingering the line and it tastes so wrong  
Could you take anymore?  
You just don't know

You can get what you always wanted  
Set you ablaze and watch you burn  
You double your praise and can't answer  
Oh, yeah!

We all want something  
We all want something  
Can't help fighting with fate  
We all want something  
Can't help fighting with fate
